

La Red Health Center

was created by local residents to improve access to health care for all Sussex County residents. We treat each patient with dignity and respect by supporting individual health care decisions. Every member of your family can receive medical services at La Red Health Center.

Each provider at La Red Health Center is Board Certified or Board-eligible. We treat infants, children, adults, pregnant women, and seniors.

As a Federally Qualified Health Center, we provide extra support services on-site which makes it possible for us to meet most of your health care needs in one convenient location.

Our name comes from the Spanish word for "The Network" which refers to our extensive network of community health care partners in Sussex County and throughout the state.

We also coordinate your health care with other local health and social service organizations & community resources.
